ENVIRONMENTAL PROTECTION POLICY

The management of Qatar Engineering and Construction Company WLL (Qcon) considers Environmental Protection as one of the core element in our business. It is the philosophy of the company to achieve business excellence through Environmental Protection; giving consideration of paramount importance to our employees and other interested parties, ecology, terrestrial and or endangered species.

Qcon is committed to:

1. Compliance with all applicable Statutory Regulations, National and International Environmental Laws and other standard requirements which Qcon subscribes to.
2. Implementation of an effective Environmental Management System to minimize adverse environmental aspects and impacts which would affect environment, endangered species, Qcon's employees and other interested parties.
3. Provide framework for continual improvement on Environmental Protection by setting Targets, Objectives and Programmes on relevant levels and functions in our organization.
4. Provide the necessary resources on education, trainings and skills, and the motivation of all employees so that this Policy is consistently implemented all throughout.
5. Recording of non-conformance and any of the environmental emissions at all levels, and to use this information in ensuring that proper and efficient work practices are established.
6. Assuring that contractors and suppliers working for Qcon commit to the environmental requirements of principals, and demonstrate such commitment in all their activities;
7. Reviewing this policy for continuing suitability of its application, ensuring that it is well understood by our employees and is always available to interested parties and or the public.
